

## **Year 7 homework: Landscape in a box**

Your task:

To produce a 3D landscape in a box.

It can be somewhere you have been, somewhere you would like to go to or somewhere you are interested in. It can be anywhere in the world.

- Choose an empty box. It could be a shoe box, cereal box, takeaway container etc.
- Decide on the landscape you're going to create. It could be close to home or far away, rural or urban. You may find it useful to find a picture of the place.
- The lid should form the background of the landscape and inside the box should be the 3D model of the foreground.
- You can build the 3D model from whatever materials you like.
- Make sure you have a few notes about what and where it is.
